EXAMINER'S AMENDMENT

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joseph Christian on 04/07/2005.

The application has been amended as follows:

Cancel claims 22, 48-51, 53-62, 64, and 73;

In (claim 67, line 1) delete "65" and instead insert --20--;

In (claim 68, line 1) delete "65" and instead insert --20--;

In (claim 69, line 1) delete "65" and instead insert --20--;

In (claim 70, line 1) delete "65" and instead insert --20--;

In the specification (page 1, between lines 1 and 2) after "1999," insert --now Pat. No. 6,536,188--.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or suggest the claimed combination of method for automatically aseptically bottling aseptically sterilized foodstuffs as amended and supported by the reasons provided in the remarks of the amendment filed on 07/08/2004 and 03/04/2005.

In particular, the prior art of record fails to disclose the claimed method of automatically aseptically bottling aseptically sterilized foodstuffs comprising in combination the steps of

aseptically disinfecting bottles at a rate greater than 100 bottles per minute and aseptically filling the bottles with aseptically sterilizing foodstuffs, in the claims environment (Figs. 3 and 13).

Note that the prior art fails to provide high output aseptic filler that process more than 100 bottles per minute that complies with the stringent United States FDA standards for labeling a packaged product as "aseptic". Using extended shelf life (ESL) packaging techniques the product is commonly extended to about 90 days, but by using the aseptic packaging techniques the shelf life increase to 150 days or more.
